Welcome Message

Dear distinguished guests, ladies and gentlemen and TSCI members,

On behalf of the Taiwan Society of Cardiovascular Interventions (TSCI), I would like to express my sincere welcome to all of you participating in the Taiwan Transcatheter Therapeutics (TTT) 2024, which will be held at NTUH International Convention Center in Taipei, Taiwan on January 6th to 7th.

After twenty years of efforts and supports from our members and international societies, TTT has become one of the internationally renowned cardiovascular interventional conferences. Last year, TTT 2023 meeting was successfully held under the threat of the COVID-19 pandemic. Now this pandemic is finally reaching the end of its impact on our life and daily activities. I am delighted to announce that TTT 2024 is bracing for more enriched programs and more participants.

As in the past, TTT2024 features one and a half days live demonstrations on well-selected and educative cases to showcase the cutting-edge treatments of coronary, peripheral and structural diseases by invited domestic and international masters. Watching these thrilling live demos will inspire our thinking and advance our skills in our daily interventional practices. In alignment with advances in CHIP, our TTT 2024 demonstrations will demonstrate the Impella mechanical support device and intravascular Lithotripsy by Shockwave in selected cases.

As always, the well-organized international society sessions are musts to see and not to miss by any means. The chairmen, panelists, and the contents of any one of these sessions (TCT, TCTAP, CVIT, CCT, ENCORE SEOUL, APSIC, Cross-Strait) are masters from different countries and super-selected hot topics for deep diving. Anyone who finishes these sessions will be advanced in not only up-to-date knowledge but also in niche skills in interventions. Therefore, all of you are encouraged to indulge in these activities and have conversations with these big sharks. For those of you who are interested in structural and peripheral interventions, these sessions are also full of new devices, novel treatments, and unbelievable cases.

Last, but not the least, are the case competition sessions. These are always the focus of young interventionists and showcase fabulous cases accomplished by marvelous intervention skills. All the attendants will be amazed by the most outstanding cases and inspired to do even more miraculous cases in their future interventional careers.

In the end, I would like to thank my colleagues for their planning of TTT 2024, and every company which supports our society and this meeting fully. Furthermore, I would like to express my sincere thanks to our members for their support and encouragement to our society, so that the society can grow sturdily and move toward a better goal.

Welcome everyone to participate in TTT 2024 on January 6th to 7th in Taipei!
