Welcome Message

Distinguished guests, dear friends and colleagues, all TSCI members, ladies and gentlemen

On behalf of the Taiwan Society of Cardiovascular Intervention (TSCI), I would like to welcome you all to the 21st edition of our annual event, the Taiwan Transcatheter Therapeutics (TTT). With the collective effort of the past boards and members, TTT has established itself as one of the most educative and innovative conferences in the region, providing opportunities to share knowledge and exchange opinions among the interventional communities from all over the world.

TTT 2025 boasts, as in the past editions, rich and multi-faceted contents. Well-selected cases will be performed by local and foreign experts and transmitted live from Cheng Hsin General Hospital, Tai Chung Veterans General Hospital, and Kao Hsiung Veterans General Hospital. These educative live cases will allow the attendee to learn cutting edge technology and devices in the treatment of coronary, peripheral, and structural heart diseases. The discussions on the strategy and techniques will also enhance the clinical decision making and practice.

The keynote speech session highlights specially picked titles regarding the important recent ground breaking researches in the field. In depth presentation and analysis on these study results, presented by the primary investigators in person, allows for thorough data examination and exchange of opinions. Our colleagues will for sure benefit from the contents and be able to keep up with the latest scientific progress in an evidence-based fashion.

The organizing committee also arranged an array of joint sessions with our friendly international organizations, including TCT, TCTAP, CVIT, CCT, ENCORE SEOUL, APSIC/AICT, HKSTENT, and Cross-Strait. Hot topics and unusual experiences will be showcased and discussed in a very interactive atmosphere, among masters from the region and around the globe. Symposiums with themes on structural heart disease, peripheral artery disease, and cath lab nursing/technician practices are also organized. Audience attending these sessions will enjoy learning the knowledge and skills in their daily work.

The young community APSC session is one of the innovations of TTT 2025. Program is designed especially for the younger generation interventionists, focusing on peer exchange in the practice as well as career development and further overseas education opportunities. Networking and sharing resources will for sure benefit our new comrades. I also recommend the always-enjoyable case competition sessions, and hands-on work shop on novel devices in the learning centers. Lively presentation and vivid communication will guarantee you a memorable experience, and boost your horizon to a newer level.

Finally, I urge you to attend our luncheon and dinner symposiums sponsored by the industry, to obtain latest scientific information and progress on pharmacological and interventional products. I also invite you all to visit the exhibition booths during the conference, to be informed on the available solutions for our patients.

The past year of 2024 has been very fruitful for Taiwan. Not only that we have spun out of the pandemic, but accomplished an exciting, noisy yet democratic election and transition of government, achieved unprecedented performance in the Paris Olympic game, and finally won the glorious championship in World Baseball Premier tournament. As for TSCI, the board and committees continue to strive together with our members, collaborating with government agencies and industry, with the ultimate purpose of enhancing the overall health care quality to the cardiovascular patients. I am expecting to see all in TTT 2025 to enjoy and award ourselves for these amazing achievements, and renew our long-lasting friendship.

My special acknowledgement goes to:

Chi-Jen Chang, Chairman of Scientific Committee

Ching-Chang Fang, Chairman of Education Committee

Tien-Ping Tsao, Chairman of International and Cross Strait Committee

Shih-Hsien Sung, Chairman of Structural Heart Diseases Committee

Chun-Chi Chen, Chairman of Peripheral Vascular Interventions Committee

Kuo-Ping Huang, Chairman of Technical Staff Committee

Yi-Lin Tsai, Chairman of Young Physician Committee

Ying-Hsien Chen, Secretary General

Hsien-Li Kao, MD.

Professor of Medicine, National Taiwan University, School of Medicine

Course Director, TTT 2025

President, TSCI

Enjoy TTT 2025!

We look forward to
seeing you at TTT 2026.
